

DARWIN

FULL-STACK WEB DEVELOPER

darwindaveconsigo@gmail.com | Taguig City, Philippines | github.com/xxxdave187 | Portfolio: darwinportfolio-website.netlify.app

PROFILE

Full-stack web developer and 4th-year BSIT student building modern, user-centered digital solutions across both JavaScript and PHP ecosystems. Has independently designed, built, and deployed four complete production-style applications end to end — from database to live hosting. Still growing as a developer, but reliable, detail-oriented, and consistently delivers clean, functional, professional-looking work on time. Actively seeking freelance projects and an internship/OJT opportunity to keep building real-world experience.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, PHP, tRPC, Prisma

Databases: MySQL, PostgreSQL, Firebase

Tools & Other: Chart.js, Git/GitHub, Netlify, responsive/UI design, currently learning Laravel

PROJECTS

Full-Stack E-Commerce Platform *Personal Project · Live*

Built a complete e-commerce platform end-to-end — product browsing, cart and checkout, user authentication, and a role-based admin dashboard with live sales analytics. Deployed to production with a live PostgreSQL database.

Stack: Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Tailwind CSS

Inventory & POS System *Personal Project · Live*

Designed and built a point-of-sale and inventory management system for small retail businesses, featuring real-time stock deduction, role-based staff access (admin/cashier), and an analytics dashboard with live charts.

Stack: PHP, MySQL, Chart.js, JavaScript

Barbershop Booking System *Personal Project · Live*

Built a real-time appointment booking platform where customers schedule services and staff manage bookings through a dedicated admin dashboard.

Stack: HTML, CSS, JavaScript, Node.js, Tailwind CSS, Firebase

CODM Esports Community Hub *Personal Project · Live*

Built a community platform for a mobile esports title with live team rosters, tournament brackets, and match schedules.

Stack: HTML, CSS, JavaScript

EDUCATION

Bachelor of Science in Information Technology

Systems Technology Institute (STI), Philippines — 4th Year (Expected graduation: 2027)

AVAILABILITY

- Open to freelance web development projects, particularly full-stack builds
- Actively seeking an internship / OJT placement to gain hands-on industry experience
- Comfortable working across both JavaScript/React and PHP/MySQL environments
